

Five Strike / Mortal Blast pairs

168,039

Direct damage before target mitigation. Updated for 150% team Damage Amplification and Mouchette's max-effect signature Wheel, **Doomsday Rampage**. This supersedes the earlier 97,228 total for your revised setup.

Source	Damage
Mortal Blast	70,856
Mouchette pursuits	87,933
Mouchette subtotal	158,789
Arachne Strikes	9,250
Combined	168,039

Setup retained

Both Awakeners Lv90, max skills and Gnostic Potential. Mouchette E2, Soulforge 10, Rouse before Exalt; Arachne unroused with no added equipment effects. Final crit rate 100%, final Crit DMG stat 150% (x2.5), STR 0. One Astral Reign Dominator; no other modifiers, relics, caps or mitigation.

Play [Arachne Strike -> Mortal Blast] five times in one turn, letting pursuits resolve between pairs. Start with zero pursuit progress, personal Strike layers and Wheel stacks. Supply the required cards/energy. Exalt's opening attack is excluded; its +645 flat Strike buff is already active. The target must survive all hits.

What the Wheel actually adds

At max effect: Exalt and pursuit Base DMG +60%. After each played Strike, Mouchette gains $\text{ceil}(258 \times 25\%) = 65$ **flat Strike damage**, up to eight times. Arachne's attack adds a stack before the next Blast; Blast adds another before the pursuit. Pursuits do not add played-card stacks themselves.

The Wheel's main stat is Death Resistance. The specified 100%/150% crit stats are held as final values, so equipment/talent crit contributions are not added again. The Wheel's Exalt Base DMG bonus affects the opening attack, not the separate +645 buff.

Per-hit working and evidence

Base inputs: Mouchette ATK 258; Arachne ATK 138. Stored skill arguments: $\text{ceil}(258 \times 30\%) = 78$ and $\text{ceil}(138 \times 20\%) = 28$. Exalt flat buff: $\text{ceil}(258 \times 250\%) = 645$. Damage Amplification 150% supplies $\times 2.5$ to the base term; Soulforge Strike Base DMG supplies $\times 1.35$.

Blast utility: $\text{ceil}((78 \times 1.35 \times 2.5 + 645 + 65w) \times (1 + 0.25k) - 0.00001)$.

Pursuit utility: $\text{ceil}((78 \times 1.35 \times 2.5 \times 1.6 + 645 + 65w) \times (1 + 0.25k) - 0.00001)$.

Mouchette per hit: $\text{ceil}(\text{utility} \times 2.5 \text{ crit} \times 1.5 \text{ Dominator})$.

Arachne per Strike: $\text{ceil}(\text{ceil}(28 \times 1.35 \times 2.5 + 645 - 0.00001) \times 2.5) = 1,850$.

w = current Wheel stack count; k = completed pursuits. The later utility floor has no effect here because reductions are neutral. Flat +645 and Wheel +65w are added after the base-only factors.

Pair / k	Wheel w Blast / pursuit	Blast per hit (x2)	Pursuit per hit (x3)	Pair total incl. Arachne
1 / 0	1 / 2	3,653	4,489	22,623
2 / 1	3 / 4	5,175	6,218	30,854
3 / 2	5 / 6	6,938	8,194	40,308
4 / 3	7 / 8	8,948	10,410	50,976
5 / 4	8 / -	10,714	None: cap reached	23,278

First-pair example

Blast: $(78 \times 1.35 \times 2.5) + 645 + 65 = 973.25 \rightarrow \text{utility } 974 \rightarrow \text{ceil}(974 \times 3.75) = 3,653$ per hit. Pursuit has two Wheel stacks: $421.2 + 645 + 130 = 1,196.2 \rightarrow \text{utility } 1,197 \rightarrow 4,489$ per hit. Pair total: $1,850 + 2 \times 3,653 + 3 \times 4,489 = \mathbf{22,623}$.

Sources and validation

SKeyDB: [Doomsday Rampage](#), [pinned source](#). PC State 123521 places the +60% in o_damage_per_ulti / o_damage_per_attachpost; Cmd 124065 adds State 124066 flat Strike layers and counter 123518 (cap eight). Original ShowDamageFormula / __GetFinalDamage matched all 14 resolved per-hit records. The event sequence uses recovered code; it is not independently gameplay verified.

Comparison only: with eligible Old Embers, sufficient stacks/HP and no HP-change immunity or cap, the extra 3x would give **672,156 combined**. That mechanic has not been confirmed for your friend's result and is not included in 168,039.
